????????? Jak zefektivnit práci v týmu

Art, Representation, and Make-Believe Nov 13 2021 This is the first collection of essays focused on the many-faceted work of Kendall L. Walton. Walton has shaped debate about the arts for the last 50 years. He provides a comprehensive framework for understanding arts in terms of the human capacity of make-believe that shows how different arts – visual, photographic, musical, literary, or poetic – can be explained in terms of complex structures of pretense, perception, imagining, empathy, and emotion. His groundbreaking work has been taken beyond aesthetics to address foundational issues concerning linguistic and scientific representations – for example, about the nature of scientific modelling or to explain how much of what we say is quite different from the literal meanings of our words. Contributions from a diverse group of philosophers probe Walton's detailed proposals and the themes for research they open. The essays provide an overview of important debates that have Walton's work at their core. This book will be of interest to scholars and graduate students working on aesthetics across the humanities, as well as those interested in the topic of representation and its intersection with perception, language, science, and metaphysics.

Jak zefektivnit práci v týmu Aug 18 2019 Skutečně platí, že se máme chovat k ostatním tak, jak chceme, aby se oni chovali k nám? Jak je možné konstruktivně využívat rozdíly mezi lidmi? Do jaké míry určuje osobnostní typ člověka způsob, jakým jej lze motivovat? Na tyto a mnoho dalších otázek odpovídá kniha erudovaných konzultantů, lektorů a koučů Anny Crkalové a Norberta Riethofa. Poutavou formou poskytují praktické návody na efektivní vedení týmů v různých oblastech podnikání. Vycházejí přitom ze své mnohaleté zkušenosti z českého prostředí. Propojují několik teoretických koncepcí (metody koučování, využití osobnostní typologie, analýza týmů) a uvádí možnosti a ukázky, jak tyto poznatky využívat v praxi. Ukazují, že z dlouhodobého hlediska přinášejí tyto nové přístupy výrazné zefektivnění činnosti, vyšší motivaci, změnu postoje k vlastnímu rozvoji, lepší pocit seberealizace a více pozitivní energie i tvořivosti. Kniha je určena vedoucím týmů, manažerům, koučům, lektorům i všem, kdo týmově pracují.

Darke Academy: 1: Secret Lives Jan 15 2022 The Darke Academy is a school like no other. An elite establishment that moves to an exotic new city every term, its students are impossibly beautiful, sophisticated and rich. And the more new scholarship girl Cassie Bell learns about the Academy, the more curious she becomes. What sinister secrets are guarded by the Few - the select group of students who keep outsiders away? Who is the dark stranger prowling the corridors at night? And what really happened a year earlier, when the last scholarship girl died in mysterious circumstances? One thing Cassie will discover is that a little knowledge may be a dangerous thing, but knowing too much can be deadly...

Modular Design of Grammar Mar 17 2022 This volume presents the latest research in linguistic modules and interfaces in Lexical-Functional Grammar (LFG). LFG has a highly modular design that models the linguistic system as a set of discreet submodules that include, among others, constituent structure, functional structure, argument

structure, semantic structure, and prosodic structure; each module has its own coherent properties and is related to other modules by correspondence functions. Following a detailed introduction, Part I examines the nature of linguistic structures, interfaces, and representations in LFG's architecture and ontology. Parts II and III are concerned with problems, analyses, and generalizations associated with linguistic phenomena of long-standing theoretical significance, including agreement, reciprocals, possessives, reflexives, raising, subjecthood, and relativization, demonstrating how these phenomena can be naturally accounted for within LFG's modular architecture. Part IV explores issues of the synchronic and diachronic dynamics of syntactic categories in grammar, such as unlike category coordination, fuzzy categorial edges, and consequences of decategorialization, providing explicit LFG solutions to such problems, including those resulting from language change in progress. The final part re-examines and refines the precise representations and interfaces of syntax with morphology, semantics, and pragmatics to account for challenging facts such as suspended affixation, prosody in multiple question word interrogatives and information structure, anaphoric dependencies, and idioms. The volume draws on data from a range of typologically diverse languages, including Arabic, Chinese, Icelandic, Kelabit, Polish, and Urdu, and will be of interest not only to those working in LFG and related frameworks, but to all those working on linguistic interfaces from a variety of theoretical standpoints.

A Dictionary of Chinese Buddhist Terms, with Sanskrit and English Equivalents and a Sanskrit-Bali Index Jun 27 2020

It's Kind of a Funny Story Feb 16 2022 Like many ambitious New York City teenagers, Craig Gilner sees entry into Manhattan's Executive Pre-Professional High School as the ticket to his future. Determined to succeed at life—which means getting into the right high school to get into the right college to get the right job—Craig studies night and day to ace the entrance exam, and does. That's when things start to get crazy. At his new school, Craig realizes that he isn't brilliant compared to the other kids; he's just average, and maybe not even that. He soon sees his once-perfect future crumbling away.

Introduction to Healthcare for Arabic-speaking Interpreters and Translators Apr 06 2021 Arabic is a language of substantial cultural and religious importance. It is spoken by about 300 million people, predominantly in the 22 countries of the Arab world, as well as in several other regions where the Arab diaspora has settled. Arabic is also the language of Islam and underpins the religious practice of about 1.5 billion Muslims worldwide. In view of the above, the authors thought it important to create an easily accessible handbook for interpreters, translators, educators and other practitioners working between Arabic and English in healthcare settings. *Introduction to Healthcare for Arabic-speaking Interpreters and Translators* follows the seminal publication *Introduction to Healthcare for Interpreters and Translators* (Crezee, 2013) and has been supplemented with Arabic glossaries and comments about health communication between Anglophones and Arabic speakers. This practical resource book will help inform interpreters and translators about healthcare settings, anatomy, physiology, medical terminology and frequently encountered conditions, diagnostic tests and treatment options. Arabic is divided into two categories: formal (Classical, Standard or literary) Arabic, and local dialects (colloquial Arabic). Formal Arabic is the official language of all Arab countries. In each of these, there are regional dialects which color formal Arabic and add character to a poetic and expressive language. Poetic nature is found in many daily expressions, and not only in Arabic literature, for example, “Good morning” in Arabic is “Ssabah al khair”, which in essence wishes others a morning of goodness; and, the pan-Arab greeting “Salam Alaykum”, which literally means “may peace be upon you”. Dialects once existed principally in spoken form but these days they are increasingly used in writing in social media and its paraphernalia (mobile phones, tablets, etc.). In this book, formal Arabic is used in the glossaries, simply because it is the recognized language of literacy across the Arabic-speaking world.

Rilla of Ingleside Aug 30 2020 *Rilla of Ingleside* Lucy Maud Montgomery - Anne's children were almost grown up, except for pretty, high-spirited Rilla. No one could resist her bright hazel eyes and dazzling smile. Rilla, almost fifteen, can't think any further ahead than going to her first dance at the Four Winds lighthouse and getting her first kiss from handsome Kenneth Ford. But undreamed-of challenges await the irrepressible Rilla when the world of Ingleside becomes endangered by far-off war. Her brothers go off to fight, and Rilla brings home an orphaned newborn in a soup tureen. She is swept into a drama that tests her courage and leaves her changed forever.

Kent Archaeological Review Feb 22 2020

A Dictionary of Chinese Buddhist Terms Aug 22 2022 This invaluable interpretive tool, first published in 1937, is now available for the first time in a paperback edition specially aimed at students of Chinese Buddhism. Those who have endeavoured to read Chinese texts apart from the apprehension of a Sanskrit background have generally made a fallacious interpretation, for the Buddhist canon is basically translation, or analogous to translation. In consequence, a large number of terms existing are employed approximately to connote imported ideas, as the various Chinese translators understood those ideas. Various translators invented different terms; and, even when the same term was

finally adopted, its connotation varied, sometimes widely, from the Chinese term of phrase as normally used by the Chinese. For instance, klésa undoubtedly has a meaning in Sanskrit similar to that of, i.e. affliction, distress, trouble. In Buddhism affliction (or, as it may be understood from Chinese, the afflicters, distressers, troublers) means passions and illusions; and consequently fan-nao in Buddhist phraseology has acquired this technical connotation of the passions and illusions. Many terms of a similar character are noted in the body of this work. Consequent partly on this use of ordinary terms, even a well-educated Chinese without a knowledge of the technical equivalents finds himself unable to understand their implications.

The Trial and Death of Socrates Dec 14 2021 Among the most important and influential philosophical works in Western thought: the dialogues entitled Euthyphro, Apology, Crito and Phaedo. Translations by distinguished classical scholar Benjamin Jowett.

Understanding Yourself and Others Mar 25 2020 Understanding Yourself and Others®: An Introduction to the Personality Type Code presents a first-of-its-kind look at the sixteen personality types and takes you deep into the richness of the patterns. You will explore the whole range of cognitive processes available to you for accessing and gathering information and for evaluating that information as well as how those processes play out in your personality in both positive and negative ways.

Principles of Virology Jul 09 2021 Principles of Virology, the leading virology textbook in use, is an extremely valuable and highly informative presentation of virology at the interface of modern cell biology and immunology. This text utilizes a uniquely rational approach by highlighting common principles and processes across all viruses. Using a set of representative viruses to illustrate the breadth of viral complexity, students are able to understand viral reproduction and pathogenesis and are equipped with the necessary tools for future encounters with new or understudied viruses. This fifth edition was updated to keep pace with the ever-changing field of virology. In addition to the beloved full-color illustrations, video interviews with leading scientists, movies, and links to exciting blogposts on relevant topics, this edition includes study questions and active learning puzzles in each chapter, as well as short descriptions regarding the key messages of references of special interest. Volume I: Molecular Biology focuses on the molecular processes of viral reproduction, from entry through release. Volume II: Pathogenesis and Control addresses the interplay between viruses and their host organisms, on both the micro- and macroscale, including chapters on public health, the immune response, vaccines and other antiviral strategies, viral evolution, and a brand new chapter on the therapeutic uses of viruses. These two volumes can be used for separate courses or together in a single course. Each includes a unique appendix, glossary, and links to internet resources. Principles of Virology, Fifth Edition, is ideal for teaching the strategies by which all viruses reproduce, spread within a host, and are maintained within populations. This edition carefully reflects the results of extensive vetting and feedback received from course instructors and students, making this renowned textbook even more appropriate for undergraduate and graduate courses in virology, microbiology, and infectious diseases.

Teaching Dialogue Interpreting May 27 2020 Teaching Dialogue Interpreting is one of the very few book-length contributions that cross the research-to-training boundary in dialogue interpreting. The volume is innovative in at least three ways. First, it brings together experts working in areas as diverse as business interpreting, court interpreting, medical interpreting, and interpreting for the media, who represent a wide range of theoretical and methodological approaches. Second, it addresses instructors and course designers in higher education, but may also be used for refresher courses and/or retraining of in-service interpreters and bilingual staff. Third, and most important, it provides a set of resources, which, while research driven, are also readily usable in the classroom – either together or separately – depending on specific training needs and/or research interests. The collection thus makes a significant contribution in curriculum design for interpreter education.

Describing Cognitive Processes in Translation May 07 2021 This volume addresses translation as an act and an event, having as its main focus the cognitive and mental processes of the translating or interpreting individual in the act of translating, while opening up wider perspectives by including the social situation in explorations of the translation process. First published as a special issue of Translation and Interpreting Studies (issue 8:2, 2013), the chapters in this volume deal with various aspects of translators' and interpreters' observable and non-observable processes, thus encouraging further research at the interface of cognitive and sociological approaches in this area. In terms of those distinctions, the chapters can be characterized as studies of the actual cognitive translation acts, of other processes related to the translation acts, or of processes that are related to the sociological translation event.

Corpora in Translation and Contrastive Research in the Digital Age Jan 03 2021 Corpus-based contrastive and translation research are areas that keep evolving in the digital age, as the range of new corpus resources and tools expands, opening up to different approaches and application contexts. The current book contains a selection of papers which focus on corpora and translation research in the digital age, outlining some recent advances and explorations.

After an introductory chapter which outlines language technologies applied to translation and interpreting with a view to identifying challenges and research opportunities, the first part of the book is devoted to current advances in the creation of new parallel corpora for under-researched areas, the development of tools to manage parallel corpora or as an alternative to parallel corpora, and new methodologies to improve existing translation memory systems. The contributions in the second part of the book address a number of cutting-edge linguistic issues in the area of contrastive discourse studies and translation analysis on the basis of comparable and parallel corpora in several languages such as English, German, Swedish, French, Italian, Spanish, Portuguese and Turkish, thus showcasing the richness of the linguistic diversity carried out in these recent investigations. Given the multiplicity of topics, methodologies and languages studied in the different chapters, the book will be of interest to a wide audience working in the fields of translation studies, contrastive linguistics and the automatic processing of language.

A Dictionary of Chinese Buddhist Terms May 19 2022 Here is an outstanding work for which two eminent scholars of Chinese Buddhism separated by 2000 miles of ocean collaborated for complete ten years during which the manuscript crossed the Atlantic four times. The authors aim has been to provide a key for the student with which to unlock a closed door and which does serve to reveal the riches of the great Buddhist thesaurus in China. In the absence of a dictionary of Chinese Buddhist Terms it was small wonder that the translation of Chinese texts has made little progress important thought these are to the understanding of Mahayana buddhism especially in its Far Eastern development.

PM Teachers Guide Blue Dec 02 2020 The PM Teacher's Guides offer invaluable support and guidance to help you gain the maximum benefit from each of the Story Books, Non-fiction Books and Traditional Tales and Plays.

Interpreting in Legal and Healthcare Settings Jun 08 2021 The importance of quality interpreting in legal and healthcare settings can never be stressed enough, when any mistake – no matter how small – can compromise the delivery of justice or put someone's health at risk. This book addresses issues arising from interpreting in legal and healthcare settings by presenting cutting-edge research findings in interpreting and interpreter education in a number of countries around the world – including those which are relatively new to the field. It contains selected papers from a conference dedicated to such themes – the First International Conference on Legal and Healthcare Interpreting – as well as other invited papers related to the fields of legal and healthcare interpreting. This book is useful not only to scholars and educators, interpreters and translators working in legal or healthcare settings, but also to legal and healthcare professionals who work with interpreters in their day-to-day work, including judges, lawyers, police officers, doctors, midwives and nurses.

Evolutionary Psychopathology Mar 05 2021 Mental disorders arise from neural and psychological mechanisms that have been built and shaped by natural selection across our evolutionary history. Looking at psychopathology through the lens of evolution is the only way to understand the deeper nature of mental disorders and turn a mass of behavioral, genetic, and neurobiological findings into a coherent, theoretically grounded discipline. The rise of evolutionary psychopathology is part of an exciting scientific movement in psychology and medicine -- a movement that is fundamentally transforming the way we think about health and disease. Evolutionary Psychopathology takes steps toward a unified approach to psychopathology, using the concepts of life history theory -- a biological account of how individual differences in development, physiology and behavior arise from tradeoffs in survival and reproduction -- to build an integrative framework for mental disorders. This book reviews existing evolutionary models of specific conditions and connects them in a broader perspective, with the goal of explaining the large-scale patterns of risk and comorbidity that characterize psychopathology. Using the life history framework allows for a seamless integration of mental disorders with normative individual differences in personality and cognition, and offers new conceptual tools for the analysis of developmental, genetic, and neurobiological data. The concepts presented in Evolutionary Psychopathology are used to derive a new taxonomy of mental disorders, the Fast-Slow-Defense (FSD) model. The FSD model is the first classification system explicitly based on evolutionary concepts, a biologically grounded alternative to transdiagnostic models. The book reviews a wide range of common mental disorders, discusses their classification in the FSD model, and identifies functional subtypes within existing diagnostic categories.

The Oxford Reference Guide to Lexical Functional Grammar Oct 24 2022 This volume is the most comprehensive reference work to date on Lexical Functional Grammar. The authors provide detailed and extensive coverage of the analysis of syntax, semantics, morphology, prosody, and information structure, and how these aspects of linguistic structure interact in the nontransformational framework of LFG. The book is divided into three parts. The first part examines the syntactic theory and formal architecture of LFG, with detailed explanations and comprehensive illustration, providing an unparalleled introduction to the fundamentals of the theory. Part two explores non-syntactic levels of linguistic structure, including the syntax-semantics interface and semantic representation, argument structure, information structure, prosodic structure, and morphological structure, and how these are

related in the projection architecture of LFG. Chapters in the third part illustrate the theory more explicitly by presenting explorations of the syntax and semantics of a range of representative linguistic phenomena: modification, anaphora, control, coordination, and long-distance dependencies. The final chapter discusses LFG-based work not covered elsewhere in the book, as well as new developments in the theory. The volume will be an invaluable reference for graduate and advanced undergraduate students and researchers in a wide range of linguistic sub-fields, including syntax, morphology, semantics, information structure, and prosody, as well as those working in language documentation and description.

Why is 'Why' Unique? Dec 22 2019 Why is 'Why' Unique? Its Syntactic and Semantic Properties considers the behaviour of this peculiar wh-element across many different languages, including Ewe, Trevisan, Italian, Basque, German, Dutch, Cantonese, Mandarin, English and Hebrew. In ten original chapters, the authors explore various aspects of why-questions, such as the way why interacts with V2 constructions in Basque, with a subject clitic in Trevisan or how its morpho-syntactic make-up determines its merge position in Ewe, to mention but a few. Furthermore, a clear-cut distinction is established between high and low reason adverbials which are subsequently examined in why-stripping environments in Dutch. Beyond why proper, the book explores a special class of wh-expressions in some in-situ languages which give rise to unexpected why-construals with a touch of whining force. The objective is to explain the unusual syntactic position of these wh-expressions as well as their association with peculiar pragmatics. The questions are addressed for Cantonese: are what-initial sentences genuine questions? To what extent are Cantonese what-initial sentences similar to how-initial sentences in Mandarin? Beside these what-as-why questions, a special class of rhetorical questions, the doubly-marked interrogatives in Hebrew, come under scrutiny. Why is 'why' unique also concerns the interface with prosody and several experimental studies investigate precisely this aspect.

Changing Paradigms and Approaches in Interpreter Training Apr 25 2020 This collection offers a unified treatment of the latest research on interpreter training in Central Europe with a special focus on community interpreting. The volume brings together perspectives from scholars working across different countries to map the current state-of-the-art in interpreter training in the region. Across thirteen chapters, the book highlights the diverse range of innovative approaches interpreters and interpreter trainers are implementing in response to changing student populations and broader social changes around migration bringing an increase in refugee communities in the region. Contributors analyze combined methodologies integrating new approaches to community interpreting with traditional conference interpreter training. Different chapters also look at novel perspectives on motivational aspects of interpreter training to examine the ways universities in the region are responding to a new generation of interpreter trainees. Offering an up-to-date synthesis of the latest approaches in interpreter training in Central Europe and takeaways for the discipline more broadly, this book will be of interest to students and scholars in interpreting studies, as well as active interpreter trainers and program coordinators.

Do What You Are Jul 21 2022 Finding a career path that you're passionate about can be difficult—but it doesn't have to be! With this bestselling guide, learn how to find a fulfilling career that fits your personality. *Do What You Are*—the bestselling classic that has helped more than a million people find truly satisfying work—is now updated for the modern workforce. With the global economy's ups and downs, the advent of astonishing new technology, the migration to online work and study, and the ascendancy of mobile communication, so much has changed in the American workplace since this book's fifth edition was published in 2014. What hasn't changed is the power of Personality Type to help people achieve job satisfaction. This updated edition, featuring 30% new material, is especially useful for millennials and baby boomers who are experiencing midlife career switches, and even those looking for fulfillment in retirement. This book will lead you through the step-by-step process of determining and verifying your Personality Type. Then you'll learn which occupations are popular with each Type, discover helpful case studies, and get a full rundown of your Type's work-related strengths and weaknesses. Focusing on each Type's strengths, *Do What You Are* uses workbook exercises to help you customize your job search, get the most out of your current career, obtain leadership positions, and ensure that you achieve the best results in the shortest period of time.

Principles of Virology, Volume 1 Aug 10 2021 Principles of Virology, the leading virology textbook in use, is an extremely valuable and highly informative presentation of virology at the interface of modern cell biology and immunology. This text utilizes a uniquely rational approach by highlighting common principles and processes across all viruses. Using a set of representative viruses to illustrate the breadth of viral complexity, students are able to understand viral reproduction and pathogenesis and are equipped with the necessary tools for future encounters with new or understudied viruses. The INTP Quest Jul 29 2020

Linking up with Video Nov 25 2022 This volume is intended as an innovating reader for both interpreting practitioners as well as scholars, engaging with the multifaceted question addressed in the title “Why linking up with video?”. The chapters in this volume deal with this question from different perspectives. On the one hand, the volume continues the ongoing discussion on the pros and cons of video-based interaction for the interpreting profession, exploring the implications and applications when interpreters and their clients link up through video technology. On the other hand, the chapters also explore the potential of video technology for research on interpreting, hence raising the question in which way high-quality video recordings of interpreters in the booth, participants involved in interpreter-mediated talk, etc. may be instrumental in gaining new insights. In this sense, the volume strongly ties in with the fast-growing field of multimodal (interaction) studies, which makes use of video recordings to study the relationship between verbal and nonverbal resources, such as gestures, postural orientation, gaze and head movements, in the construction of meaning in communication.

The Sign Language Interpreting Studies Reader Sep 11 2021 In Sign Language Interpreting (SLI) there is a great need for a volume devoted to classic and seminal articles and essays dedicated to this specific domain of language interpreting. Students, educators, and practitioners will benefit from having access to a collection of historical and influential articles that contributed to the progress of the global SLI profession. In SLI there is a long history of outstanding research and scholarship, much of which is now out of print, or was published in obscure journals, or featured in publications that are no longer in print. These readings are significant to the progression of SLI as an academic discipline and a profession. As the years have gone by, many of these readings have been lost to students, educators, and practitioners because they are difficult to locate or unavailable, or because this audience simply does not know they exist. This volume brings together the seminal texts in our field that document the philosophical, evidence-based and analytical progression of SLI work.

The INTP Dec 26 2022

Complementizers on edge: On the boundaries between syntax and pragmatics in Ibero-Romance Apr 18 2022 This book offers a comparative perspective on the structural and interpretive properties of root-clause complementizers in Ibero-Romance. The driving question the author seeks to answer is where the boundaries between syntax and pragmatics lie in these languages. Contrary to most previous work on these phenomena, the author argues in favor of a relatively strict distribution of labor between the two components of grammar. The first part of the book is devoted to root complementizers with a reportative interpretation. The second part deals with root complementizers and commitment attribution. Finally, the last part presents the results of empirical studies on the topic.

The Early Ayn Rand Jun 20 2022 This remarkable, newly revised collection of Ayn Rand's early fiction—including her previously unpublished short story *The Night King*—ranges from beginner's exercises to excerpts from early versions of *We the Living* and *The Fountainhead*.

Germans to America Jan 23 2020 Title of the first 10 volumes of the series is *Germans to America* : lists of passengers arriving at U.S. ports 1850-1855.

Conference Interpreting – A Complete Course Oct 12 2021 The conference interpreting skillset – full consecutive and simultaneous interpreting – has long been in demand well beyond the multilateral intergovernmental organizations, notably in bilateral diplomacy, business, international tribunals and the media. This comprehensive coursebook sets out an updated step-by-step programme of training, designed to meet the increasingly challenging conditions of the 21st century, and adaptable by instructors with the appropriate specializations to cover all these different applications in contemporary practice. After an overview of the diverse world of interpreting and the prerequisites for this demanding course of training, successive chapters take students and teachers through initiation and the progressive acquisition of the techniques, knowledge and professionalism that make up this full skillset. For each stage in the training, detailed, carefully sequenced exercises and guidance on the cognitive challenges are provided, in a spirit of transparency between students and teachers on their respective roles in the learning process. For instructors, course designers and administrators, more detailed and extensive tips on pedagogy, curriculum design and management will

be found in the companion Trainer's Guide.
