Dakota, Chrasey, and Jordan have been best friends since college. Now they're about to discover their wild school days have nothing on the dramas of adulthood. . . As friends, Dakota, Chrasey, and Jordan are alike and dissimilar in many ways. Dakota is the only single one in the group. She and

Jordan both thrive on their high-powered careers--and the men in their lives almost always come second. But when Dakota's boyfriend becomes more than she can handle, she realized that strength in the boardroom does not translate to the bedroom. Chrusey and Jordan have marriage in common--and the temptation to have an affair with two irresistible men. Now these three friends who have been through the best and worst times together, will have to rely on their strong bonds and trust the truth that lies buried deep within their hearts to discover who they really are--and find the life they've been waiting for all along. . . "I felt like I was experiencing one of my own girls' nights out." -- Lala, MTV VJ "More juicy drama than any reality show. . .Janine writes for the everyday diva in all of us." --Miss Info, author of *Bling, Bling: Hip Hops Crown Jewels*, *Hot 97 Jock*, Vibe columnist A great body and amazing flat abs is what we all aspire for. If you thought that it was only possible at a hi-tech gym, think again. This unique book written by one of the most well-known yoga master of our times helps you develop those breath-taking abs in the comfort of your home with the help of a very dynamic and effective set of yogic exercises, specially designed by the author. Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding. Anyone interested in learning to play electric bass can pick up this book and get started right away. This well-paced, comprehensive method covers everything from basic to advanced techniques. Beginning concepts include the basics of the instrument, reading music, and building bass lines using scales, modes, and chord progressions. For the intermediate player, it takes you further into using scales, techniques such as slap & pop, string muting, walking bass lines, modes, tetrachords, passing tones, and varying rhythms. The book concludes with ideas designed to guide you into high-level bass playing, such as rhythm changes, tritone substitution, odd time signatures, chord playing, a study of Latin grooves, reggae, ska, and

advanced funk bass lines. Whether you are starting to learn the bass or are an advanced player looking to give your playing more nuance, Electric Bass Method Complete is all you will ever need. Access to online audio demonstration examples is included with the book. "The "Computers Nobody Wanted" is a history of an ill-conceived acquisition, in 1969, of Xerox's entry into the computer business to its subsequent abandonment. The text discusses attempts to convert a superior scientific computer to replace Xerox' own IBM computers that were processing business applications. The author was responsible for managing these conversions against technical obstacles that could not be overcome. After spending tens of millions for technology improvements, Xerox decided to exit from the computer business. The book also traces investments in a computer workstation - the STAR computer - from conception in 1973 to its dissolution in 1984. It describes the pioneering research at the Xerox PARC (Palo Alto Research Center) and how an inspired group produced superb innovations that were of no commercial value. During this epoch Strassmann was Vice-President of Strategic Planning for the Information Products Group that was responsible for transfer of PARC results to the marketplace. [This] introductory textbook examines theories of personality, starting from the viewpoint that there are eight basic aspects to personality: psychoanalytic, ego, biological, behaviorist, cognitive, trait, humanistic, and interactionist. Later chapters apply these aspects to individual differences such as those of gender and culture. Summaries after each chapter encapsulate key theorists and concepts discussed. -<http://www.bn.com>. This is a rigorous, carefully explained and motivated "beginner's bible" to power supply design. Between dense, mathematical textbooks on power electronics and tiny power supply "cookbooks" there exists no practical tutorial on the hazards of contemporary power supply design. Our Pressman book, the 800 lb gorilla in the field, is both mathematically dense and 7 years old. This new book, detailing cutting edge thermal

management techniques, grouping key design equations in a special reference section, and containing a concise Design FAQ, will serve both as an invaluable tutorial and quick reference. The idea for this book was conceived by the late Dr. Irvine A. Watson of the University of Sydney, and he developed the first outline. I was then invited by Dr. Watson to share in its writing. Unfortunately, shortly thereafter, recurring heart problems forced him to curtail his activities and withdraw from the project. He died before the book could be completed. Dr. Watson's intention was to produce a very practical book that would provide wheat breeders with all of the information necessary to breed successfully for resistance to the three wheat rusts: leaf rust, stem rust, and yellow rust. It was intended to be very specific in describing procedures to be used and at the same time provide all of the necessary theoretical background. I hope that I have been successful in meeting these objectives. The book assumes that the reader has some knowledge of plant pathology, genetics, and plant breeding. Extensive use has been made of the literature, but it was not possible to cite all of the papers on a given topic. In making a choice, an attempt was made to choose key papers or more recent papers that provided references to the earlier literature. Acknowledgements This book was written partly at the University of Saskatchewan and partly at the University of California, Davis, while I was on a sabbatical leave. “Savvily combines literary themes and cross-stitch designs in [a] visually appealing collection of projects . . . delightful.” —Publishers Weekly Inside Book Riot’s Lit Stitch, you’ll find a number of badass, bookish cross-stitch patterns to let you show off your love of all things literary. Some are for bookmarks, others are for wall decor, and still others can take on a whole host of finished outcomes. What they have in common is their literary bent—the patterns speak to all manner of literary-minded book lovers, who are happy to display their nerdier sides. And what better way than through your own cross-stitch art to hang on your wall, prop on your desk, or

even gift to friends and family? Most if not all are beginner-friendly and can be completed in a few hours—instant stitchification! So grab yourself some excellent embroidery floss, hoops, and needles, and pick out one or more of these great cross-stitch patterns for your next project. This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. Britain's best-selling comic, 'The Beano' celebrates its 75th birthday this year Join Dennis the Menace, The Bash Street Kids, Roger the Dodger and Minnie the Minx for 112 pages of mischief, mayhem and menacing Welcome to Teranesia, the island of butterflies, where evolution has stopped

making sense. Prabir Suresh lives in paradise, a nine-year-old boy with an island all his own: to name, to explore, and to populate with imaginary creatures stranger than any exotic tropical wildlife. Teranesia is his kingdom, shared only with his biologist parents and baby sister Madhusree. The evolutionary puzzle of the island's butterflies that brought his family to the remote South Moluccas barely touches Prabir; his own life revolves around the beaches, the jungle, and the schooling and friendships made possible by the net. When civil war breaks out across Indonesia, this paradise comes to a violent end. The mystery of the butterflies remains unsolved, but nearly twenty years later reports begin to appear of strange new species of plants and animals being found throughout the region — species separated from their known cousins by recent, dramatic mutations that seem far too useful to have arisen by chance from pollution, disease, or any other random catastrophe. Madhusree is now a biology student, proud of her parents' unacknowledged work, and with no memories of the trauma of the war to discourage her, she decides to join a multinational expedition being mounted to investigate the new phenomenon. Unable to cast off his fears for her safety, Prabir reluctantly follows her. But travel between the scattered islands is difficult, and Madhusree has covered her tracks. In the hope of finding her, Prabir joins up with an independent scientist, Martha Grant, who has come to search for both clues to the mystery and whatever commercial benefits it might bring to her sponsor. As Prabir and Martha begin to untangle the secret of Teranesia, Prabir is forced to confront his past, and to face the painful realities that have shaped his life. ARCHIE 3000 is the complete collection featuring the classic series. This is presented in the new higher-end format of Archie Comics Presents, which offers 200+ pages at a value while taking a design cue from successful all-ages graphic novels. Travel to the 31st Century with Archie and his friends! In the year 3000, Riverdale is home to hoverboards, intergalactic travel,

alien life and everyone's favorite space case, Archie! Follow the gang as they encounter detention robots, teleporters, wacky fashion trends and much more. Will the teens of the future get in as much trouble as the ones from our time? The inside of Derren Brown's head is a strange and mysterious place. Now you can climb inside and wander around. Find out just how Derren's mind works, see what motivates him and discover what made him the weird and wonderful person he is today. Obsessed with magic and illusions since childhood, Derren's life to date has been an extraordinary journey and here, in *Confessions of a Conjuror*, he allows us all to join him on a magical mystery tour - to the centre of his brain... Taking as his starting point the various stages of a conjuring trick he's performing in a crowded restaurant, Derren's endlessly engaging narrative wanders through subjects from all points of the compass, from the history of magic and the fundamentals of psychology to the joys of internet shopping and the proper use of Parmesan cheese. Brilliant, hilarious and entirely unlike anything else you have ever read before, *Confessions of a Conjuror* is also a complete and utter joy. Neo-Hasidism applies the Hasidic masters' spiritual insights—of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service—to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber

initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path. It was Life and Time magazines that turned a local story from Tucson, Arizona, into a national abomination. Reporters came from all over, to be sure, but on March 4, 1966, Life printed an ominous photo of the desert landscape where three girls had disappeared and the story of Charles Howard Schmid, Jr., or "Smitty," became international news. He had been arrested four months earlier on November 11, just after marrying a fifteen-year-old girl whom he'd met on a blind date. The article was published even before the juries in two separate trials had decided his fate. Dubbed "The Pied Piper of Tucson," for his ability to get girls to fall for him, he stood five feet, four inches tall, but added three more inches by padding his stack-heeled cowboy boots with rags and tin cans. He also dyed his reddish-brown hair black, used pancake make-up, whitened his lips, and applied a fake mole to his left cheek-a "beauty" mark. Arrogant and narcissistic, he came from a wealthy family, so he used the niceties he could buy to impress young high school girls. He adopted the droopy-eyed look associated with Elvis, his idol, and acquired a rock musician's mystique. His tiny house on his parents' property was the scene of many parties. Tucson society was not merely shaken by the murders of three of their young women but by what the details of those murders revealed about its adolescent population-sex clubs, drinking parties, blackmail, cover-ups for murder, and even connections with the crime underworld. Parents suddenly became more strict, more aware now that their kids weren't safe and maybe weren't even behaving properly. When kids

looked to someone like Charles Schmid for answers, there was something terribly wrong. Any attempt to understand the roles that textbooks played for early modern teachers and pupils must begin with the sobering realization that the field includes many books that the German word *Lehrbuch* and its English counterpart do not call to mind. The early modern classroom was shaken by the same knowledge explosion that took place in individual scholars' libraries and museums, and transformed by the same printers, patrons and vast cultural movements that altered the larger world it served. In the fifteenth through seventeenth centuries, the urban grammar school, the German Protestant Gymnasium and the Jesuit College, all of which did so much to form the elites of early modern Europe, took shape; the curricula of old and new universities fused humanistic with scholastic methods in radically novel ways. By doing so, they claimed a new status for both the overt and the tacit knowledge that made their work possible. This collected volume presents case studies by renowned experts, among them Ann Blair, Jill Kraye, Juergen Leonhardt, Barbara Mahlmann-Bauer and Nancy Siraisi. A series of six books for Classes IX and X according to the CBSE syllabus New York Times-bestselling author and cultural critic Chuck Klosterman sorts through the past decade and how we got to now. Chuck Klosterman has created an incomparable body of work in books, magazines, newspapers, and on the Web. His writing spans the realms of culture and sports, while also addressing interpersonal issues, social quandaries, and ethical boundaries. Klosterman has written nine previous books, helped found and establish Grantland, served as the New York Times Magazine Ethicist, worked on film and television productions, and contributed profiles and essays to outlets such as GQ, Esquire, Billboard, The A.V. Club, and The Guardian. Chuck Klosterman's tenth book (aka *Chuck Klosterman X*) collects his most intriguing of those pieces, accompanied by fresh introductions and new footnotes throughout. Klosterman presents many of the

articles in their original form, featuring previously unpublished passages and digressions. Subjects include Breaking Bad, Lou Reed, zombies, KISS, Jimmy Page, Stephen Malkmus, steroids, Mountain Dew, Chinese Democracy, The Beatles, Jonathan Franzen, Taylor Swift, Tim Tebow, Kobe Bryant, Usain Bolt, Eddie Van Halen, Charlie Brown, the Cleveland Browns, and many more cultural figures and pop phenomena. This is a tour of the past decade from one of the sharpest and most prolific observers of our unusual times. You could say that my railroad, the Madham Line, is almost the most important thing in my life. Next to Andy Morrow, my best friend. Lots of people think Doug Hanson is a freak -- he gets beat up after school, and the girl of his dreams calls him a worm. Doug's only refuge is creating an elaborate bridge for the model railroad in his basement and hanging out with his best friend, Andy Morrow, a popular football star who could date any girl in school. Doug and Andy talk about everything -- except what happened at the Tuttle place a few years back. It does not matter to Andy that we live in completely different realities. I'm Andy's best friend. It does not matter to Andy that we hardly ever actually do anything together. As Doug retreats deeper and deeper into his own reality, long-buried secrets threaten to destroy both Doug and Andy -- and everything else in Doug's fragile world. The nation's most popular health spa share some of its secrets for relieving stress, exercising regularly, eating right, and bringing spirituality into the home. Field Manual (FM) 3-34.5/Marine Corps Reference Publication (MCRP) 4-11B, "Environmental Considerations," establishes and explains the principles of environmental support in full spectrum operations and the ways in which United States Army and United States Marine Corps (USMC) commanders develop and implement command environmental programs. This manual provides guidance on integrating environmental considerations into the conduct of operations. It defines environmental considerations and provides guidance on their integration into the operations

process. This manual also provides guidance on the development of command environmental programs and standing operating procedures (SOPs) to support operations and training. A six-week health-bolstering program identifies such contributors to poor health as malnutrition and an impaired metabolism and offers advice on how to remove toxins from the body and implement healthy nutrition and supplement regimes. Developing your learning skills is one of the best investments you can make. We all need to be lifelong learners now. Whether you are an experienced student or just starting out this book will stimulate, guide and support you. It will make you think about yourself and how your mind learns. And it will change forever the way that you study. Topics include:- motivating yourself and managing your time- taking full advantage of your computer- reading with concentration and understanding- developing flexible note-taking strategies- getting the most from seminars and workshops- making presentations- researching online- handling numbers and charts with confidence- writing clear, well argued assignments- doing yourself justice in exams. Sodium hypochlorite has long been recognized for its effectiveness as an antiseptic and disinfectant, but its practical use in medicine had been limited due to its reduced stability. However, it has been shown that the method of manufacture can make the vital difference: The ExSept solutions (Amuchina) discussed in this publication differ from other commercially manufactured solutions insofar as they are produced with the help of electrolysis, the result being a highly effective antimicrobial with very good biocompatibility. The papers in this volume concentrate on the experiences made with ExSept solutions in dialysis applications. They provide a sound understanding of how electrolytically produced sodium hypochlorite solutions differ from other commercial solutions, present different uses as both an antiseptic and disinfectant and alleviate some of the stereotypes associated with

their medical use. Both in vitro controlled laboratory evaluations and clinical in vivo prospective randomized trials are introduced in this publication, making it a valuable help for clinicians working in the field of dialysis. John Yolton seeks to allow readers of Locke to have accessible in one volume sections from a wide range of Locke's books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The rest of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and commentary explicate Locke's doctrines and provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time. Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland

Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start. This book is an exciting history of the personal computer revolution. Early personal computing, the "first" personal computer, invention of the microprocessor at Intel and the first microcomputer are detailed. It also traces the evolution of the personal computer from the software hacker, to its use as a consumer appliance on the Internet. This is the only book that provides such comprehensive coverage. It not only describes the hardware and software, but also the companies and people who made it happen. This comprehensive NCLEX®

review program is designed for individual student NCLEX® review. The popular NCLEX® 4000 study software provides more than 4,000 NCLEX®-quality review questions covering all 29 topics in five major content areas, including fundamentals, pediatrics, psychiatric-mental health, maternal-neonatal, and medical-surgical nursing. The software delivers NCLEX®-style multiple-choice questions and alternate-format questions. Three study modes-pretest, review, and test-give correct and incorrect answers with rationales and new supporting references. NCLEX® 4000 includes important new questions on prioritizing and delegation, a key topic on the NCLEX® exam. Updated to reflect the National Council of State Boards of Nursing's latest test plan, including all forms of alternate-format questions.
