Foreword by Miuccia Prada.

Avner Ben-Gal Aug 18 2019 The paintings and drawings of Israeli artist Avner Ben-Gal, born in 1966, depict barren landscapes with burning houses and isolated figures. The dreamlike scenarios literally elude the viewer, obscured as they often are under monochromatic veils of color. This first monograph collects recent work alongside contributions by Philipp Kaiser and Yael Bergstein.

SSC JE Civil Engineering (Paper 1) | 10 Full-length Mock Tests (2000+ Solved Questions) Dec 26 2022 • Best Selling Book in English Edition for SSC JE Civil Engineering (Paper 1) Exam with objective-type questions as per the latest syllabus given by the SSC. • Compare your performance with other students using Smart Answer Sheets in EduGorilla's SSC JE Civil Engineering (Paper 1) Exam Practice Kit. • SSC JE Civil Engineering (Paper 1) Exam Preparation Kit comes with 10 Full-length Mock Tests with the best quality content. • Increase your chances of selection by 14X. • SSC JE Civil Engineering (Paper 1) Exam Prep Kit comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts.

Globalization and Regional Dynamics Jan 03 2021 The writings by Japanese and German economists presented here originated against the backdrop of ongoing globalization processes and notable fluctuations in regional economic dynamics observable at the same time, primarily in the East and South East Asian area. They provided the occasion for these writers to come to terms with globalization processes, and in particular with the stabilizing and destabilizing elements at work in them. This is the basis for their investigation of the options provided by economics and economic policy for stabilizing an ever more tightly interwoven world economy. The regional focal points of the contributions are the East Asian realm and the European Union, and the points of view are in every case both from the Japanese and the German side. Questions of international competition and mechanisms of the spread of the crisis in the wake of globalization processes lie at the centre of the analyses by

Hisashi Watanabe and Willy Kraus. Hisashi Watanabe focusses on the relationship, an especially important one from the Japanese perspective, between Japan and South Korea and takes up the problem of South Korea's demand that Japan should energetically promote its own transition to a service-sector-oriented society and withdraw from certain areas of manufacturing. This, it is argued, will grant Japan's Asian neighbours better chances for development and make a positive contribution to the economic stabilization of the region.

Comparing Post War Japanese and Finnish Economies and Societies Sep 18 2019 This book compares two countries with striking parallels in economic and political outcomes, yet with some distinct features in terms of institutional structures, relative size, and culture. Therefore, this book forms a fruitful platform for the study of the similarities and differences in the economic and societal development of Japan and Finland. Despite their geographic distance from one another and the aforementioned differences, both countries experienced rather similar economic and societal development patterns after the Second World War. The study of these societies both individually and through commonalities will provide a unique perspective on the emergence of modern economies and institutions. The book provides comprehensive coverage on issues such as welfare state formation and society, security and military spending, education system, industrial development, international trade, governmental economic policies, energy solutions, and bubbles and their collapse; thus, issues typical for these countries, as well as most modern states, studied from a longitudinal perspective. The book aims to answer a

fundamental question in social science: Why do there seem to be common trends and developmental paths among countries differing in size, culture, and economic structure? This book will provide insights for those seeking to decipher how the developments in their own countries came about and where they may be headed to.

Troy Brauntuch May 07 2021 A member of the so-called Pictures Generation, Troy Brauntuch ndash; whose career spans some three decades ndash; has often been characterized, with his peer Jack Goldstein, as taking a postmodern attitude toward representation. He is well known for his works from the end of the 1970s and beginning of the 1980s in which he decontextualized what would otherwise be hyperbolically charged content. In his most recent work, Brauntuch extends his investigations to the space between a thing and our idea of it. In his photographs, everyday objects assert their ephemerality, and a tangible, intimate silence seems as much a part of the pictures as the simple domestic scenes they convey. This book offers the first survey of Brauntuch's work and includes newly commissioned essays by Johanna Burton and Douglas Eklund (the curator of the recent Pictures Generation exhibition at the Metropolitan Museum in New York). English text.

EMC '91: Non-Ferrous Metallurgy—Present and Future May 27 2020 This volume contains the papers that will be presented at 'EMC '91 '-the European Metals Conference-to be held in Brussels, Belgium, from 15 to 20 September 1991, and organized by Benelux Metallurgie, GDMB (Gesellschaft Deutscher Metallhütten und Bergleute) and IMM (the Institution of Mining and Metallurgy). 'EMC '91' is the first of an intended major series organized at the European level with the aim of bringing together all those who are involved with the extraction and processing of non-ferrous metals-European metallurgists and their international colleagues-to provide them with the opportunity to exchange views on the state and evolution of their industry. The programme covers all the different aspects of the metallurgy of non-ferrous metals from mining to fabricated products. Particular attention is being paid to the European non -ferrous industry with respect to changes in demand, the

technology used, pressures on the environment and the competitive position of manufacturers. The contributions of the plenary lecturers (copies of which will appear in the IMM journal Minerals Industry International in 1991-92) and the many authors are gratefully acknowledged. Thanks are also due to the referees of the papers, the sponsors, the companies that have allowed registrants to visit their operations, the chairmen of the technical sessions and the staffs of the organizing bodies for their efficient administrative work. Dual-Fuel Diesel Engines Feb 16 2022 *Dual-Fuel Diesel Engines* offers a detailed discussion of different types of dual-fuel diesel engines, the gaseous fuels they can use, and their operational practices. Reflecting cutting-edge advancements in this rapidly expanding field, this timely book: Explains the benefits and challenges associated with internal combustion, compression ignition, gas-fueled, and premixed dual-fuel engines Explores methane and natural gas as engine fuels, as well as liquefied petroleum gases, hydrogen, and other alternative fuels Examines safety considerations, combustion of fuel gases, and the conversion of diesel engines to dual-fuel operation Addresses dual-fuel engine combustion, performance, knock, exhaust emissions, operational features, and management Describes dual-fuel engine operation on alternative fuels and the predictive modeling of dual-fuel engine performance *Dual-Fuel Diesel Engines* covers a variety of engine sizes and areas of application, with an emphasis on the transportation sector. The book provides a state-of-the-art reference for engineering students, practicing engineers, and scientists alike.

Long-Term Solutions for a Short-Term World Jan 23 2020 *Long-Term Solutions for a Short-Term World* demonstrates the complexity of the challenges that poor countries face and introduces the readers to the concept and impact of participatory research for development. Participatory research requires researchers to work with communities, governments, and other relevant actors to deal with common problems. Finding solutions requires

participants to reflect critically on the cultural, economic, historical, political, and social contexts within which the issue under investigation exists. The book contains a collection of essays from development researchers and professionals, each of whom is an activist who has made significant contributions to the struggles of the poor in their own societies. Essays are presented as case studies and, in each, the contributor explains the specific development problem, the paths followed to solve the problem, lessons learned as a result of the research, and the development challenges on the horizon in his field of research. Together, these essays present a fascinating picture of how some of today's most pressing development issues are being dealt with through research, demonstrating how interdisciplinary and alternative approaches can be implemented in new and innovative ways.

Energy and Environment Nov 01 2020 It is becoming evident that satisfying the ever-increasing global demand for energy is having a major impact on the environment. The technologies required to minimize such impacts are discussed here in an in-depth overview and review of a broad spectrum of energy and environmental issues. The first five sections of the book deal directly with scientific and technological topics: the production, transportation, and utilization of electric power; thermal science and engineering for energy conservation/utilization processes; gas hydrates; multiphase mechanics for energy and environmental technology; pollutants and radioactive wastes in the earth. The sixth section, unique in a book of this type, focuses on education, recording a panel discussion on solutions to problems of energy and environment. For specialists and nonspecialists alike, the book is thus a valuable guide to the technological challenges for the future.

Contemporary France Nov 20 2019 At least since the French Revolution, France has the peculiar distinction of simultaneously fascinating, charming and exasperating its neighbours and foreign observers. Contemporary France provides an essential introduction for students of French politics and society, exploring contemporary developments while placing them in a deeper historical, intellectual, cultural and social context that makes for insightful analysis. Thus, chapters on France's economic policy and welfare state, its foreign and European policies and its political movements and recent institutional developments are informed by an analysis of the country's unique

political and institutional traditions, distinct forms of nationalism and citizenship, dynamic intellectual life and recent social trends. Summaries of key political, economic and social movements and events are displayed as exhibits.

Universal Access in Human-Computer Interaction: Applications and Services for Quality of Life Sep 30 2020 The three-volume set LNCS 8009-8011

constitutes the refereed proceedings of the 7th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 230 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this three-volume set. The 78 papers included in this volume are organized in the following topical sections: universal access to smart environments and ambient assisted living; universal access to learning and education; universal access to text, books, ebooks and digital libraries; health, well-being, rehabilitation and medical applications; access to mobile interaction.

Land Reforms in India Jul 29 2020 This is the tenth volume in a major series which studies the status of land reforms throughout the country. It examines the progress achieved and the difficulties encountered in the computerisation of land records in various states. In 1988, the central government sponsored the Computerisation of Land Records (CoLR) scheme to tackle the recurring problems thrown up by inadequate land records system.

Providing a critical appraisal of CoLR, the 20 articles in the volume are divided into three sections: Computerisation of Land Records; Digitisation of Cadastral Maps; and Land Information System. Based on empirical data and field studies, this volume is an important contribution towards understanding the socio-economic realities and social dynamics of contemporary India in the framework of land reforms.

To Err Is Human Feb 04 2021 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book

offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Microbiological Issues in Papermaking features in-depth and thorough coverage of microbiological issues in papermaking and their consequences and the current state of the different alternatives for prevention, treatment and

control of biofilm/slime considering the impact of the actual technological changes in papermaking on the control programmes. The microbial issues in paper mill systems, chemistry of deposits on paper machines, the strategies for deposit control and methods used for the analysis of biofouling are all dealt in this book along with various growth prevention methods. The traditional use of biocides is discussed taken into account the new environmental regulations regarding their use. Finally, discusses the trends regarding the future of the microbiological control in papermaking systems. In-depth coverage of microbiological issues in papermaking and their consequences Discusses eco-efficient processes (green processes) for biofilm/slime control Offers a thorough review of the current literature with links to the primary literature Comprehensive indexing Author is an authority in the pulp and paper industry
