PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. In this third edition, more than 40 renowned authorities introduce and update chapters on the theory, fundamentals, techniques,

and instrumentation of thin-layer chromatography (TLC) and high-performance thin-layer chromatography (HPTLC), highlighting the latest procedures and applications of TLC to 19 important compound classes and coverage of TLC applications by compound type. Easily adaptable to industrial scenarios, the Handbook of Thin-Layer Chromatography, Third Edition supports practical research strategies with extensive tables of data, offers numerous figures that illustrate techniques and chromatograms, and includes a glossary as well as a directory of equipment suppliers. This is a comprehensive book on technology for classroom and online learning for educators. Everything you need to know about using educational technology such as computer networking, peripherals, security, troubleshooting and maintenance, and teaching and learning with technology are covered. Airway Management in Emergencies 2/e covers all the options both medical and surgical for managing any patient's airway in an emergency. Here, you'll find the core knowledge and accompanying management protocols necessary to assess, oxygenate, intubate and monitor patients requiring emergency airway management. This new edition expands coverage of airway management in the pre-hospital environment and chapters on airway management with airway and systemic comorbidities. Additionally, there is enhanced content to appeal to various clinicians (MD and non-MD eg. Paramedics). Key Features Brimming

with beautiful pictures, this successful book guides you through a project-based, progressive curriculum so that you can build all the essential skills to enhance photographs creatively and professionally with Photoshop CS3. If you are an aspiring professional, enthusiastic amateur photographer, or a student learning photography, digital imaging, art and design, or design graphics, you'll be amazed at the stunning results you can achieve! New! DVD is included FREE. Additional learning materials include \* full-resolution, royalty-free images to download for trying-out your new techniques \* over 8 hours of QuickTime movie tutorials to support the practical projects \* Presets from layer styles to curves, shapes, and gradients \* indispensable RAW files for editing practice And don't miss the companion website with updates, practice material, and more at [www.photoshopessentialskills.com](http://www.photoshopessentialskills.com)! "The perfect companion guide for Photoshop users of multiple levels." Photoshop Creative Magazine "This book provides excellent coverage of Photoshop as a digital darkroom tool, as well as covering a truly amazing amount of background information. It is very readable and is truly a gem." Mark Lewis, Director, Mount Saint Mary College, USA The Essential Skills Photography Series from Focal Press uniquely offers a structured learning experience for photographers of all ages, with both the underlying theory and loads of invaluable 'how to' and real-life practice

projects - all from the most talented photography practitioners/educators in the world. Each subject includes: \* learning objectives for each section - for class use or self-study \* color images of student and teacher/author work \* activities to check learning outcomes \* assignments to put theories into creative practice \* full glossary of terms Other titles in the series: Studio Photography: Essential Skills by John Child, Photographic Lighting: Essential Skills by John Child and Mark Galer and Digital Photography in Available Light by Mark Galer. Closed circuit television (CCTV) is experiencing a leap in technology using digital techniques and the Internet. The new edition of this high-level professional reference retains the particulars that made the first edition a success, including the details of CCD cameras, lenses, coaxial cables, fiber-optics, and system design, but it is expanded to cover all video compression techniques used in the ever increasing assortment of digital video recorders (DVRs) available on the market today. It also serves to clarify the technology of data networking. The theoretical section explains the various compression techniques, such as MPEG-1, MPEG-2, JPEG, Wavelet, H.261/263, JPEG-2000, MPEG-4, etc. Networking is also a new and unknown area for many CCTV installers and this is explained in a brand new section. The challenge of selecting the right system from such a wide variety of new

technologies available in CCTV has been compounded by the advent of DVRs. This new edition of the book CCTV demystifies DVR technology. - Covers brand new digital video recorder (DVR) compression techniques, image quality, measuring and networking - Fully illustrated with dozens of photographs, tables, checklists, charts, diagrams and instructions - Encompasses CCTV standards for U.S., Europe, and Australia PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. Learn to use Oracle 9i to build dynamic, data-driven Web sites. Get step-by-step details on creating and deploying Web applications using PL/SQL, HTML, Java, XML, WML, Perl and PHP. This book covers everything users need to know to master Web application development in an Oracle environment - using PL/SQL. Endoscopic Techniques in Plastic and Aesthetic Surgery comprehensively addresses both the aesthetic and reconstructive aspects of endoscopic surgery as applied to plastic surgery. The editors, renowned pioneers of these techniques, have assembled a group of distinguished contributors to present, step-by-step, the operative strategies for incorporation of endoscopic procedures to the armamentarium of the practicing plastic surgeon. The procedures are precisely and exquisitely rendered by 721

illustrations, including over 300 full color endoscopic views and operative photographs. This book is the essential, definitive source for mastery of these state-of-the-art techniques. This publication contains guidelines for fish stock assessment and fishery management using the software tools and other outputs developed by the UK Department for International Development's Fisheries Management Science Programme (FMSP) from 1992 to 2004. It includes a CD-ROM with the installation files for each of the four FMSP software tools: LFDA (Length Frequency Data Analysis), CEDA (Catch Effort Data Analysis), YIELD and ParFish (Participatory Fisheries Stock Assessment). Apple's exciting new Mastered for iTunes (MFiT) initiative, introduced in early 2012, introduces new possibilities for delivering high-quality audio. For the first time, record labels and program producers are encouraged to deliver audio materials to iTunes in a high resolution format, which can produce better-sounding masters. In iTunes Music, author and world-class mastering engineer Bob Katz starts out with the basics, surveys the recent past, and brings you quickly up to the present—where the current state of digital audio is bleak. Katz explains the evolution of standards for dynamic range through the present and with implications for the future. He details the new methods that Apple is developing to accept high resolution audio and shows step by step how audio engineers and producers can take advantage of them. This

book is designed for all those dealing with sound, from sound engineers to music industry executives and musicians—and those aspiring to all these roles. This book will help you understand the issues around delivering high-quality environment and get all your facts straight for when you encounter resistance to good sound. Topics covered include:

- Contrasting the production of CD albums with iTunes albums
- High Resolution audio
- Dithering
- Distortion (and how to avoid it)
- Lossy Coding
- Loudness Metering
- Sound Check and how it affects our production techniques
- Apple's tools for Mastered for iTunes

Foreword by renowned mastering engineer Bob Ludwig. Join the forums at [www.digido.com/iTunes](http://www.digido.com/iTunes), for the latest information and discussions!

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. High definition is here to stay. HD changes the whole shooting and editing process in film and television production and this book is to satisfy your hunger for information. Whether you are a cinematographer, producer, or working in film/TV production, High Definition Cinematography, 2nd edition will demystify the new technology, help you select the right cameras and equipment, and explain how high definition affects the shooting

technology. This volume contains the proceedings of the NATO Advanced Study Institute on "Picture Archiving and Communication Systems (PACS) in Medicine" held in Evian, France, October 14- 26, 1990. The program committee of the institute consisted of H.K. Huang (Director), Osman Ratib, Albert Bakker, and Gerd Witte. This institute brought together approximately 90 participants from 15 countries. These proceedings are the accumulation of eight years of research and development results in PACS by various dedicated groups throughout the world. The purpose of this institute was to review the most recent technology available for PACS and some clinical results. The readers should notice the remarkable advances in this field by comparing the contents in these proceedings with those in a previous institute on "Pictorial Information Systems in Medicine" held August 27 - September 7, 1984 in Braunlage/Harz, Federal Republic of Germany, and published as Vol. 19 in this series. The institute was organized according to four categories: PACS components and system integration, PACS and related research in various countries and manufacturing companies, clinical experience and research support, and participants' scientific communications. In PACS components, we included image acquisition, workstations, data storage and networking. In system integration, topics on interfaces between Hospital Information System (HIS), Radiology Information System (RIS) and PACS, clinical

reports, the ACR/NEMA standard, databases, reliability, and system integration were discussed. This lecture series emphasized the technical detail and "how to" aspects.
