Award-winning Amarillo Globe-News columnist David Horsley is back with another collection of his personal essays from the newspaper. This time David's readers have selected over 100 of his best columns on topics ranging from the humorous to the serious to the sublime. Here are light-hearted favorites such as Chaw McCuddy's review of violinist Itzhak Perlman, David's encounter with a feral cat named Osama and the women who defended it, The Colonoscopy Chronicles, the true story of a black bra and how it inflamed readers' imaginations, and fantasies such as the Magnetron an imaginary device for disabling loud car stereos. Serious subjects close to David's heart proved popular with readers as well, such as his reflections on the death of his father and the tragedy of the space shuttle Columbia. Included are essays about parenting, computers, handguns, and a requiem for Gus the dog. Topics of global significance are treated as well: 9/11, war, terrorism, and homelessness. David writes honestly about religion and politics in this volume, examining the proper role of critical thinking in religion and exploring the implications of public prayer. This book will have you laughing one minute and crying the next, which might be why Texas Panhandle readers voted him Amarillo's most popular newspaper columnist. Then, on a routine space flight, Major Ry Evine inadvertently frees a captive vessel that crash-lands on Bienvenido carrying the last, best hope for human survival: a baby. But a far from ordinary one. The child not only ages at a remarkable rate but demonstrates knowledge and abilities far beyond those of Bienvenido's humans. Over 1,000 total pages .... INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft. This information will be of interest not just to general audiences, including those who are deaf, but also to linguists and students of linguistics. By providing information on sign languages in a manner accessible to a less specialist audience, this volume fills an important gap in the literature. It describes the march mission, characteristics and types of foot marches, and march training to include planning procedures, duties of commanders, march discipline, march hygiene, and march safety.
