Privacy in statistical databases is about finding a tradeoff to the tension between the increasing societal and economical demand for accurate information and the legal and ethical obligation to protect the privacy of individuals and enterprises, which are the source of the statistical data. Statistical agencies cannot expect to collect accurate information from individual or corporate respondents unless these feel the privacy of their responses is guaranteed; also, recent surveys of Web users show that a majority of these are unwilling to provide data to a Web site unless they know that privacy protection measures are in place.

“Privacy in Statistical Databases 2004” (PSD2004) was the 7th annual conference of the CASC project (“Computational Aspects of Statistical Confidentiality”, IST-2000-25069). PSD2004 is in the style of the following conferences: “Statistical Data Protection”, held in Lisbon in 1998 and with proceedings published by the Office of Official Publications of the EC, and also the AMRADS project SDC Workshop, held in Luxemburg in 2001 and with proceedings published by Springer-Verlag, as LNCS Vol. 2316. The Program Committee accepted 29 papers out of 44 submissions from 15 different countries on four continents. Each submitted paper received at least two reviews. These proceedings contain the revised versions of the accepted papers. These papers cover the foundations and methods of tabular data protection, masking methods for the protection of individual data (microdata), synthetic data generation, disclosure risk analysis, and software/case studies. In Jan. 2012, Sec. of Defense Leon E. Panetta issued Sustaining U.S. Global Leadership: Priorities for 21st Century Defense. Key elements of that new strategic guidance were a rebalancing to the Asia-Pacific region while maintaining our commitment to partners in and around the Middle East. It also emphasized developing innovative ways to achieve security objectives, such as combined exercises and other means of building partner capacity and interoperability, and an increased use of rotational presence overseas. The 2012 Army Strategic Planning Guidance (ASPG) provided the initial vision for how the Army could best support the new strategic guidance. The 2013 ASPG is a refinement of that vision, incorporating a year’s worth of study, analysis, and experience. Though in Afghanistan the Army is proceeding to transfer security responsibility to the Afghan National Security Forces, the fight there is not yet finished. The Army has already begun preparing to meet the demands of the rebalance to the Asia-Pacific region and the emphasis on building partner capacity and shaping the security environment as directed by the new Defense strategic guidance. These changes must be made carefully, however, in this time of decreasing budgets. Figures. This is a print on demand report. That only happens in Hollywood movies that portray professional athletes exercising for hours every day until they are exhausted. Real athletes never do that. They train only to the point that they can recover for the next day's training. Their progress comes in small increments, not heroic triumphs. Unfortunately, movies have

persuaded people that they can become lean and fit virtually overnight. Even the weight loss and fitness industry bought into this distortion and began pushing people to become like Rocky. When that approach failed, because people were injuring themselves or burning out or jumping from one program to another, trainers began to entertain their clients instead of finding solutions to their problems. If you want to become truly lean and fit, you must work at it like an athlete, following a structured routine and that is easier and more pleasant than you may expect. The principles that work for athletes also work for ordinary people of all ages. Athletes, of course, have coaches. The Happy Body program, on the other hand, will teach you everything you need to know to be your own coach. This innovative program establishes, for the first time, exact scientific and testable methods and goals to engineer your own weight loss and fitness within precise time periods. That empowers you to self-correct your progress at every step. The Happy Body is a total health program, not just an exercise or diet plan. It will teach you to safely lose 1.0 to 2.5 pounds every week, and keep them off, without getting stuck at plateaus. You will have full control over the process, right down to the ounce. In addition to teaching you how to lose weight, the program will also help you to restore the flexibility and posture you had as a young child, and to be leaner, stronger, and faster than you have ever been. In essence, The Happy Body program will not only make you as youthful as you were at twenty, but twenty as you would have been if you had followed the program at that age. What do Henry Ford, Thomas Edison, Mae West, Howard Hughes, John Madden, the Partridge Family, Ken Kesey, The Who, and Barbie have in common? Each had a home on wheels-be it an old converted school bus, a massive RV cruiser, or elegant house car. These celebrity motorhomes are only the frosting on the cake in Douglas Keister's entertaining and informative new book *Mobile Mansions*. From the eclectic to the exquisite, the luxurious to the rare, Keister's incredible photography showcases the history and diversity of some of the most historic and lovingly restored RVs on the road today. Keister documents an amazing range of vehicles, including small camp cars from the 1920s, house cars from the 1930s, campers from the 1950s and finally modern-day motorhomes that first emerged in the 1960s. Well-known

brands like Winnebago, GMC, and Travco are featured as well as one-of-a-kind vehicles like the Lamsteed Kampcar, built by Anheuser Busch, the Zeppelin House Car, and Buckminster Fuller's Dymaxion car. Step inside a wide variety of motorhomes, from diminutive camp cars to diesel-belching, lumbering leviathans complete with saunas, balconies, and gourmet kitchens. Mobile Mansions details this fascinating chapter of America's history with lively text, luscious full color photographs, rare vintage photographs and offers a concise history of the recreational vehicle.
