Feminist in a Software Lab Aug 30 2022 For over a dozen years, the Vectors Lab has experimented with digital scholarship through its online publication, Vectors, and through Scalar, a multimedia authoring platform. The history of this software lab intersects a much longer tale about computation in the humanities, as well as tensions about the role of theory in related projects. Tara McPherson considers debates around the role of cultural theory within the digital humanities and addresses Gary Hall's claim that the goals of critical theory and of quantitative or computational analysis may be irreconcilable (or at the very least require far more time and care). She then asks what it might mean to design from conception digital tools and applications that emerge from contextual concerns of cultural theory and, in particular, from a feminist concern for difference. This path leads back to the Vectors Lab and its ongoing efforts at the intersection of theory and praxis.

In addition it answers the following questions : • Where and how do I start preparing for my CCIE Lab? • How much time do I need to prepare for CCIE Lab exam? • What are the dos and don'ts for the CCIE Lab? • When do I know I am ready to take my CCIE lab? • How do I study efficiently for the CCIE lab exam? • How much time should I devote daily and on weekends for studying? • What do I need to do Three months, Three weeks and the day before the lab? • What do I need to do the day after the lab (in case I don't pass)? This first of its kind guidebook is a result of filtering and crystallizing all of the ideas and

strategies that we collected from talking with a large number of CCIEs. In this guidebook we:

- Share our stories and stories of many successful CCIEs with you.
- Offer the knowledge that we have gained throughout our CCIE journey two times.
- Cover over 30 topics and issues that we have faced and that you will likely be facing.
- Will walk you through every step of the journey.
- Give you multiple timelines for engineers with different skill sets.
- Tell you the right frame of mind that you will need to pass your CCIE lab. This book is written in a very relaxing casual conversational format in which, we present to you the strategies that we used and then give our own personal example as "what we did." Disaster Recovery and Backup Solutions for IBM FileNet P8 Version 4.5.1 Systems Oct 27 2019 Many organizations require continuous operation of their mission-critical, IBM® FileNet P8® systems after a failure has occurred. Loss of system resources and services as a result of any failure can translate directly into lost customers and lost revenue. The goal, therefore, is to design and implement a FileNet P8 system that ensures continuous operation even after a failure happens. This IBM Redbooks® publication focuses on FileNet P8 Version 4.5.1 systems disaster recovery. The book covers strategies, preparation levels, site sizing, data replication, testing, and what to do during a disaster. Backup and restore planning is a critical aspect of a disaster recovery strategy. We discuss backup types and strategies. We also discuss alternative strategies such as rolling storage policies and IBM FlashCopy® capability. With the help of use cases and our lab testing environment, the book provides guidelines for setting up a FileNet P8 production environment and a standby FileNet P8 disaster recovery system. This book is intended for IT architects, IT specialists, project managers, and decision makers, who must identify the best disaster recovery strategies and integrate them into the FileNet P8 system design process.

The Matriarchs in Genesis Rabbah Aug 06 2020 Katie J. Woolstenhulme considers the pertinent questions: Who were 'the matriarchs', and what did the rabbis think about them? Whilst scholarship on the role of women in the Bible and Rabbinic Judaism has increased, the authoritative group of women known as 'the matriarchs' has been neglected. This volume consequently focuses on the role and status of the biblical matriarchs in Genesis Rabbah, the fifth century CE rabbinic commentary on Genesis. Woolstenhulme begins by discussing the nature of midrash and introducing Genesis Rabbah; before exploring the term 'the matriarchs' and its development through early exegetical literature, culminating in the emergence of two definitions of the term in Genesis Rabbah - 'the matriarchs' as the legitimate wives of Israel's patriarchs, and 'the matriarchs' as a reference to Jacob's four wives, who bore Israel's tribal ancestors. She then moves to discuss 'the matriarchal cycle' in Genesis Rabbah with its three stages of barrenness; motherhood; and succession. Finally, Woolstenhulme considers Genesis Rabbah's portrayal of the matriarchs as representatives of the female sex, exploring positive and negative rabbinic attitudes towards women with a focus on piety, prayer, praise, beauty and sexuality, and the matriarchs' exemplification of stereotypical, negative female traits. This volume concludes that for the ancient rabbis, the matriarchs were the historical mothers of Israel, bearing covenant sons, but also the present mothers of Israel, continuing to influence Jewish identity.
