The third book in the critically acclaimed and bestselling series! Knitted gifts are treasured, whatever the season. Designs unique to Newfoundland are made to keep loved ones warm all year long -- even during early summer when icebergs chill the air in the region. Capture your heart's desire with a spring cap or bonnet. Explore the spectacular coastline wearing knitted socks and fine woolen gloves. Prepare for the cool months of autumn and winter with fashionable trigger mitts and hats. And warm up your home with cozy cushions and lovely tea cozies. With this latest in the best-selling Saltwater Knits series, Christine LeGrow and Shirley A. Scott offer some of Newfoundland's most beloved knitwear designs. They also reveal the cultural heritage of these distinctive patterns and demonstrate why they are highly valued by those who live on this island known as "The Rock." Vivid photographs provide inspiration, but you are also encouraged to select your own colors -- thereby making your gifts distinctive. Like other books in this series, Saltwater Gifts includes tips, tricks, and stories. All patterns are rated by difficulty and clearly presented for today's knitters. Meet the people, sample the flavor, and experience the kinship through 11 unique events and more than 25 inspiring projects Throughout history, we've gathered together in the market square. We're there to buy and sell, to get good deals on fibers, fabrics, fruits, vegetables, and bread, but we're also there to see friends, gossip, trade recipes, and admire new clothes. We've got an eye on each other's animals, and we're going to keep them from getting into any trouble. It's our chance to hold someone else's baby or to congratulate a new grandmother. It's a chance to connect, to touch, and to bond with others. These days, it's easy to feel like we live in scary times, and sometimes we're less neighborly than we used to be. Our lives are filled with long distances and technology. We're more likely to make cyberfriends than visit with someone down the street. Our lives are full of work, school, and caretaking, but how many of us still live near our families? Our hometowns? How do we reach out to one another? —From the Introduction Art Workshop for Children is not just another book of straightforward art projects. The book's unique child-led approach provides a framework for cultivating creative thinking and encourages the wonder that comes when children are allowed to freely explore the creative process and their materials. As children work through these open-ended workshops, adults are guided on how to be facilitators who provide questions, encourage deep thinking, and help spark an excitement for discovery. Children explore basic materials and workshops that use minimal supplies, and then gradually add new materials to fill the art cabinets as well as new skills and more complex workshops. Most workshops are suitable to preschool-aged children, and each contains ideas for explorations and new twists to engage older or more experienced artists. Interspersed throughout are sidebar essays that introduce perspectives on mess-making, imperfection, the role of adult, collaborative art, and thoughts on the Reggio Emilia method, a self-guided teaching philosophy. These pieces underscore the value of art-making with children, and support the parent/teacher/care-giver on how to successfully lead, question, and navigate their children through the workshops to result in the fullest experiences. The first edition appeared fourteen years ago. Since then there have been significant advances in our science that warrant an updating and revision of Sand and Sandstone. The main framework of the first edition has been retained so that the reader can begin with the mineralogy and textural properties of sands and sandstones, progress through their organization and classification and their study as a body of rock, to consideration of their origin-prove nance, transportation, deposition, and lithification-and finally to their place in the stratigraphic column and the basin. The last decade has seen the rise of facies analysis based on a closer look at the stratigraphic record and the recognition of characteristic bed ding sequences that are the signatures of some geologic process-such as a prograding shallow-water delta or the migration of a point bar on an alluvial floodplain. The environment of sand deposition is more closely determined by its place in such depositional systems than by criteria based on textural characteristics-the "fingerprint" approach. Our revision reflects this change in thinking. As in the geological sciences as a whole, the concept of plate tectonics has required a rethinking of our older ideas about the origin and accumu lation of sediments-especially the nature of the sedimentary basins. Medicare, the world's single largest health insurance program, covers more than 47 million Americans. Although it is a national program, it adjusts payments to hospitals and health care practitioners according to the geographic location in which they provide service, acknowledging that the cost of doing business varies around the country. Under the adjustment systems, payments in high-cost areas are increased relative to the national average, and payments in low-cost areas are reduced. In July 2010, the Department of Health and Human Services, which oversees Medicare, commissioned the IOM to conduct a two-part study to recommend corrections of inaccuracies and inequities in geographic adjustments to Medicare payments. The first report examined the data sources and methods used to adjust payments, and recommended a number of changes. Geographic Adjustment in Medicare Payment - Phase II: Implications for Access, Quality, and Efficiency applies the first report's recommendations in order to determine their potential effect on Medicare payments to hospitals and clinical practitioners. This report also offers recommendations to improve access to efficient and appropriate levels of care. Geographic Adjustment in Medicare Payment - Phase II: Implications for Access, Quality, and Efficiency expresses the importance of ensuring the availability of a sufficient health care workforce to serve all beneficiaries, regardless of where they live.
