PowerPoint Slides This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models, such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground

and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT-markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model. Americans have contradictory beliefs about how international trade affects the country as whole and specific communities. Yet notwithstanding the heat of political rhetoric, these beliefs are rarely mobilized into political action. Alexandra Guisinger examines this apparent disconnect by

examining the bases of Americans' trade preferences in today's post-industrial economy and why do so few politicians attempt to take advantage of these preferences. The changing American economy has made the direct effects of trade less obvious, making the benefits and costs more difficult to determine. In addition, information sources, including the media, have changed in content and influence over time, their influence varies across different groups of individuals, and partly as a result individuals hold countervailing beliefs about the effect of trade on their own and others' economic outcomes. American Opinion on Trade provides a multi-method examination of the sources of attitudes, drawing on survey data and experimental surveys; it also traces how trade issues become intertwined with attitudes toward redistribution as well as gender and race. This volume focuses on the contemporary political, economic and security affairs of the Western Hemisphere. Following a decade of focus on economic matters around the Free Trade Area of the Americas (FTAA), the authors argue that the Bush Doctrine formed in the wake of 9/11 has resulted in a renewed U.S. concentration on security matters. With the ever-increasing interconnection between markets, businesses and individuals from all over the globe, professionals are asked to develop a greater interest in the international implications of contracts. This book focuses attention on the distribution agreement, one of the most widely used contractual schemes in the practice of international exchanges, providing a analysis and information on the issues that should be considered by the practitioner when drafting, interpreting or executing an international agreement. Issues relating to the choice of the governing law, the competent court, the validity or invalidity of some clauses, the impact that the language of the

contract may have, as well as the different meaning and scope of application of some principles, such as good faith and *le estoppel*, are analyzed from a transnational perspective, highlighting how the same issue can be regulated differently depending on the regulatory framework that governs it. In this second edition, the distribution relationship has been evaluated mainly across the legal systems of the European Union, the United States and Latin America, while not missing references to other regulatory frameworks, which are highlighted in correspondence with particular issues. This book deals with a subject that has recently been the focus of debate and law reform in many jurisdictions: how much scope should spouses have to conclude agreements concerning their financial affairs - and under what circumstances should such agreements be binding and enforceable? These marital agreements include pre-nuptial, post-nuptial and separation agreements. The book is the result of a British Academy-funded research project which investigated and compared the relevant law of England and Wales, Australia, Austria, Belgium, France, Germany, Ireland, the Netherlands, New Zealand, Scotland, Singapore, Spain, Sweden and the jurisdictions of the United States. In addition to chapters on these jurisdictions, the book includes a chapter on the 'English practitioner's view'. It also provides a comparative analysis of the different matrimonial property regimes and the rules on marital agreements that explores underlying themes and principles and makes recommendations for regulating marital agreements. A key theme is the function and effect of marital agreements in the different jurisdictions. Thus, each chapter first explains the underlying 'default' rules for ancillary relief/matrimonial property and maintenance. It then analyses the current rules for marital agreements, and gives a brief account of the private international law rules. The book provides a comprehensive source of reference on ancillary relief/matrimonial property and maintenance and the rules on pre-nuptial, post-nuptial and separation agreements in 14 jurisdictions. It offers guidance for academics and practitioners dealing with international matters, and a basis for discussions on law

reform. 'I applaud the vision and perseverance of Jens Scherpe in having conceived this book and, with so much distinguished help, in now bringing it to birth. I will be using it for many years and I warmly invite my fellow family lawyers across the world to do likewise.'
Foreword by The Rt Hon Lord Wilson of Culworth, Justice of the Supreme Court of the United Kingdom
